1 Registry to Study Advanced Breast Cancer and Treatment Response

Show Scientific Title

Purpose: To create a registry that will be used to study how breast cancer spreads and why people respond differently to specific breast cancer treatments.

Who is this for?: People with advanced (some stage III) or metastatic (stage IV) breast cancer. [View full eligibility criteria](#)

[Full Trial Details](#)

Nearest Location:
3 miles
UCSF Medical Center-Mission Bay
San Francisco, CA

Your treatment history information plays an important role in determining whether you are eligible for a trial. For example, some trials require that you have received a certain number or type of prior treatments, while other trials are for people who have not yet received any treatment for metastatic breast cancer.

★ **Remember:** Help is always available.

Let's walk through the process of adding your prior medications for metastatic breast cancer to your MTS profile. Don't worry about entering your medications in chronological order; MTS will arrange them for you.

Biological Sex [Female, Post-menopausal](#)

Birth Year [1963](#)

Zipcode [94107](#)

Race [Native Hawaiian or Other Pacific Islander](#)

Latino/a or Hispanic [Prefer not to answer](#)

TREATMENT HISTORY

Have you received treatment for your metastatic breast cancer? ☒ Yes ☐ No ☐ Skip this question
Add surgery, radiation, and medication.

Note: Please be sure to enter medication, radiation, or surgery for accurate results. Otherwise, select "Skip this question" to view trials regardless of treatment received for metastatic breast cancer.

Medication for metastatic breast cancer

ADD METASTATIC MEDICATION

Metastatic treatment: Medications

+ ADD OR EDIT MEDICATION

Are you currently on this treatment?

☐ Yes ☐ No

START DATE

Month YYYY

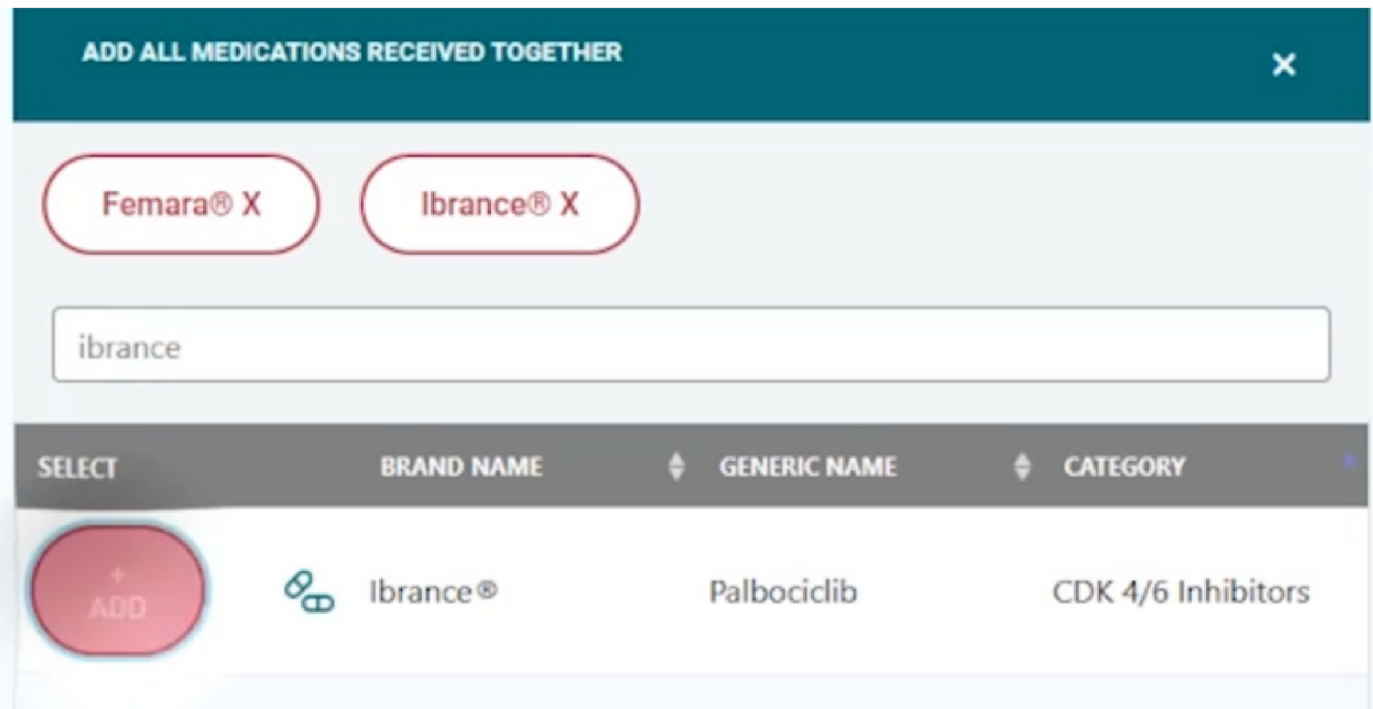

For example, let's say you have hormone receptor positive, HER2 negative metastatic breast cancer and your first treatment included hormone therapy and a CDK inhibitor taken together.

On your MTS profile, you can enter this information by clicking "add a line of therapy."

A line of therapy refers to all medications taken at the same time. You can click "add or edit medication" to add the two drugs you took together for this line of therapy. If the treatment you received was a combination drug or a regimen, which is more than one drug received at the same time, be sure to input each individual drug into this line of therapy. You can always consult your doctor for more information about the drugs you have received.

★ **Remember:** Help is always available.

For this example, let's add Femara, a hormone therapy, and Ibrance, a CDK inhibitor. If you know their brand names, you could start by typing "Femara" and "Ibrance". Or you could search by their generic names, "Letrozole" and "Palbociclib".

SELECT	BRAND NAME	GENERIC NAME	CATEGORY
	 Ibrance®	Palbociclib	CDK 4/6 Inhibitors

You can also sort by brand names and generic names to see the drugs in alphabetical order, or you can sort by category if you can't remember the name of the drugs. If you have any questions about the drugs you've taken, be sure to check your medical records or ask your doctor.

Click "add" for each drug to include them in this line of therapy.

CANCEL**APPLY**

Click "apply" to confirm the medications in this line of therapy. Next, you will enter whether you are currently on the treatment.

 **Remember:** Help is always available.

Input the start date for the medication, and if you are no longer on the treatment include the end date. These dates can be estimated; they do not have to be exact.

Metastatic treatment: Medications

Ibrance®, Femara®

+ ADD OR EDIT MEDICATION

Are you currently on this treatment?

☐ Yes ☒ No

START DATE

April 2022

Month YYYY

2023

Jan Feb Mar Apr

May Jun Jul Aug

Sep Oct Nov Dec

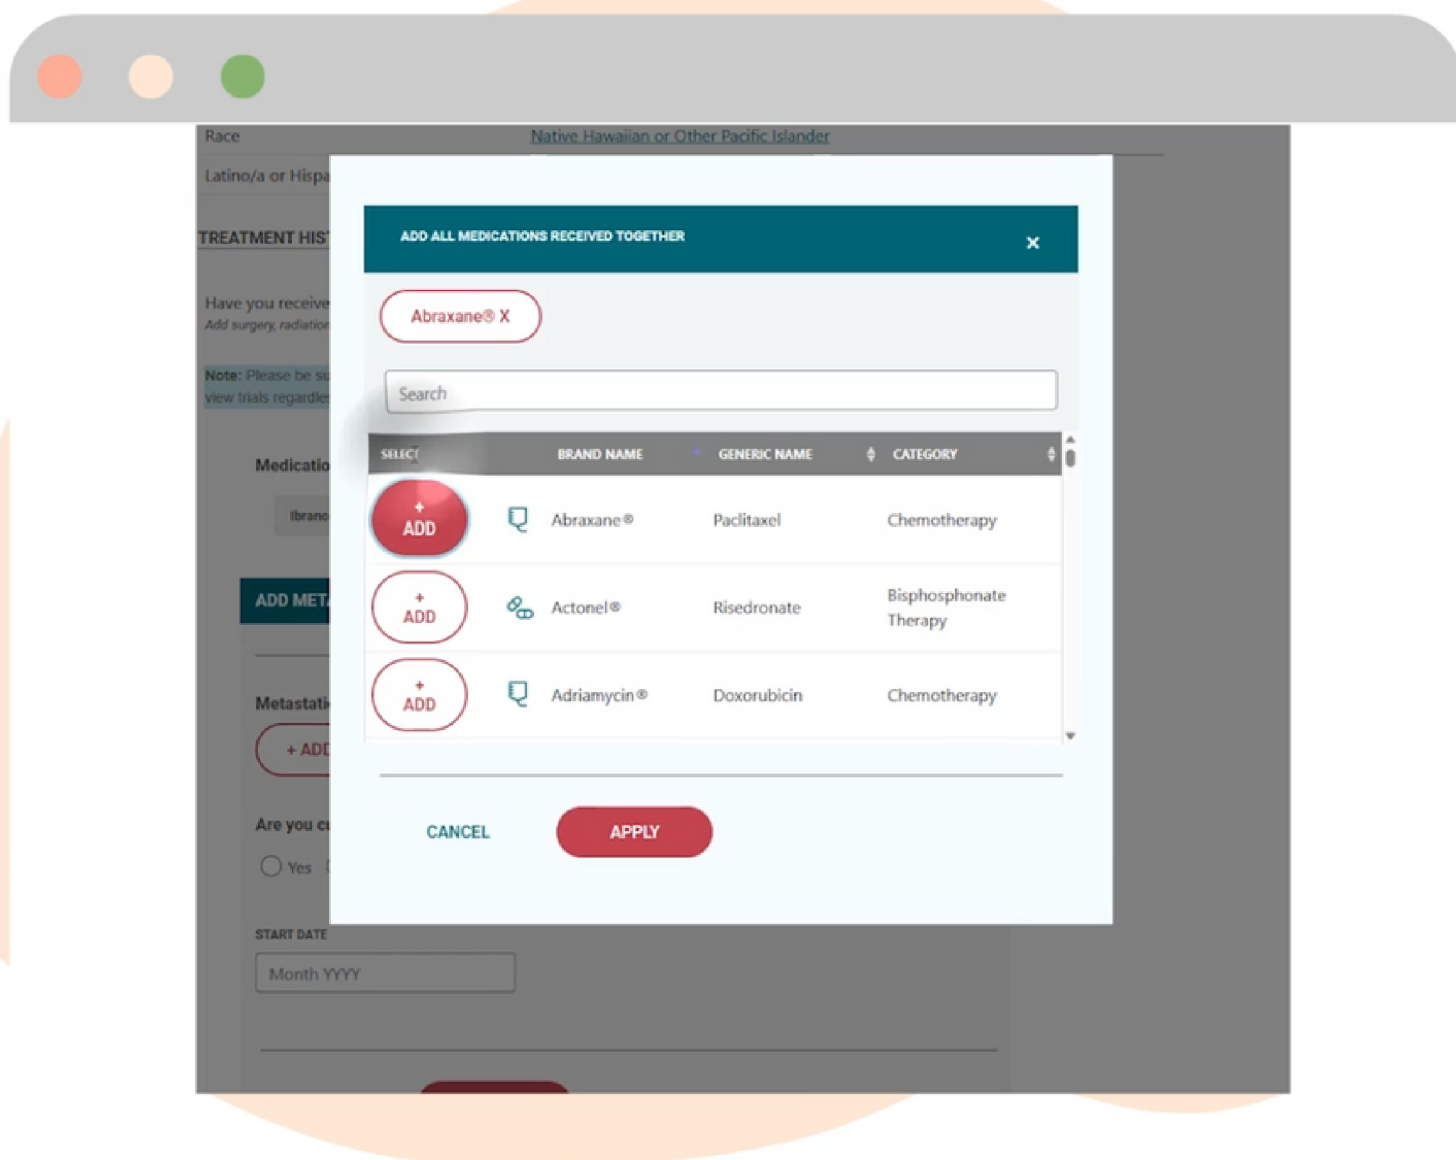

You will also be asked if your cancer progressed while on these drugs. Now click “apply” again to complete this line of therapy.

Did your cancer progress on this treatment?

☐ Yes ☐ No

★ **Remember:** Help is always available.

Once you have finished adding all prior lines of therapy, you can add the treatment that you are currently taking. This is a new line of therapy, so click “Add line of therapy” again.

Race Native Hawaiian or Other Pacific Islander

Latino/a or Hispanic

ADD ALL MEDICATIONS RECEIVED TOGETHER

Abraxane® X

Search

SELECT	BRAND NAME	GENERIC NAME	CATEGORY
<input type="radio"/>	Abraxane®	Paclitaxel	Chemotherapy
<input type="radio"/>	Actonel®	Risedronate	Bisphosphonate Therapy
<input type="radio"/>	Adriamycin®	Doxorubicin	Chemotherapy

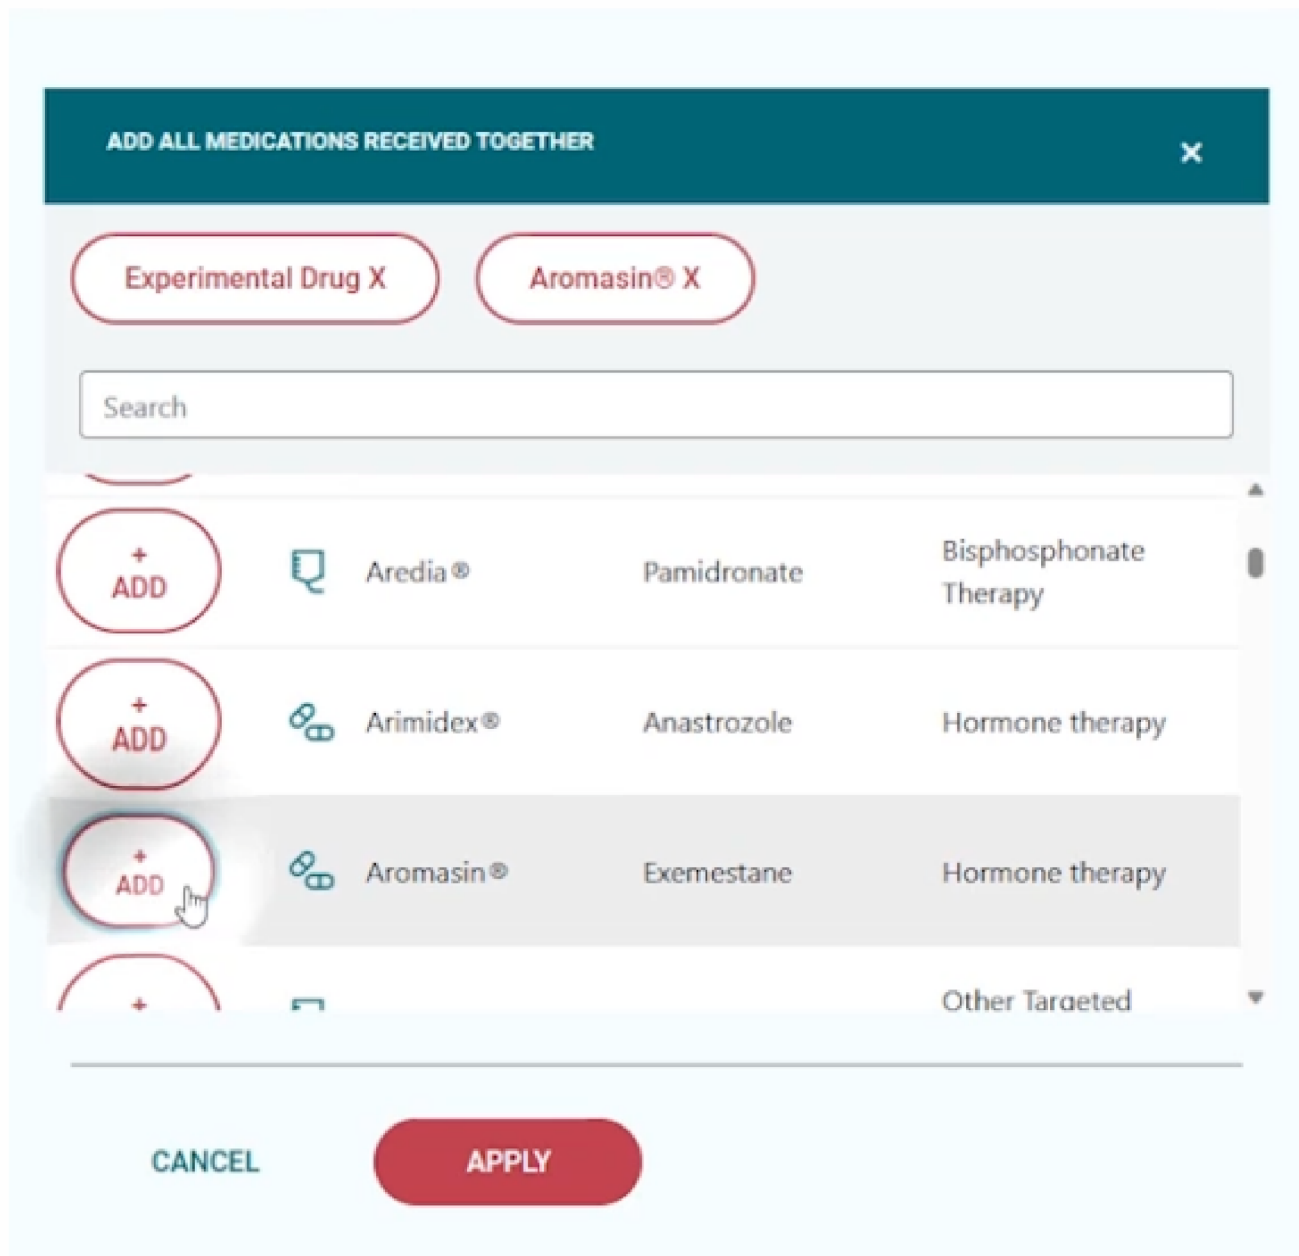

CANCEL APPLY

For this example, let's say you are currently receiving Abraxane chemotherapy.

Once you click “apply”, simply click the button that says you’re currently on this therapy, and enter the start date.

★ **Remember:** Help is always available.

What if you participated in a clinical trial as a line of therapy?

ADD ALL MEDICATIONS RECEIVED TOGETHER [X]

Experimental Drug X Aromasin® X

Search

+ ADD	 Aredia®	Pamidronate	Bisphosphonate Therapy
+ ADD	 Arimidex®	Anastrozole	Hormone therapy
+ ADD	 Aromasin®	Exemestane	Hormone therapy
+ ADD			Other Targeted

CANCEL APPLY

When choosing the medication, select “Experimental” as a drug option. If you also received any standard of care drugs in the clinical trial, be sure to add them to the line of therapy as well. If you don’t see the name of a drug you received, you can select “Other”.

★ **Remember:** Help is always available.

In this example, you have now completed your drug treatment history.

Finish your health profile by entering any radiation or surgery you've received for metastatic breast cancer. You can also enter any medications you received for your initial breast cancer diagnosis.

Have you received medication for your previous breast cancer? ☒ Yes ☐ No ☐ Skip this question
Add medication only.

Note: Please be sure to enter medication(s) for accurate results. Otherwise, select "Skip this question" to view trials regardless of medication received for early stage breast cancer.

Add early stage medication to treatment history:

Adriamycin®, Cytosan®, Taxol®, Arimidex®

To make things easier, the system does not require you to input dates for your earlier treatment since only the types of drugs you've received affect your current trial eligibility.

With your health profile completed, you are now ready to save and view trials that match your diagnosis.

If your treatment ever changes, update your profile to ensure the most accurate trial matches.

Do you need more help? You can always call or email us if you need help filling out your profile or understanding how to find trials using MTS.
