

The **Trial Results Page** lists all of the trials that match your MTS profile. However, there will be additional requirements, known as eligibility criteria, that will ultimately determine whether or not you can enroll in a trial. You can view the full set of criteria for each trial by clicking the “View full eligibility criteria” link on each listing.

If you are a guest, you can register at any time to:

- enter your treatment history to receive more refined and accurate trial results;
- save and update your profile;
- return to the site to easily view new trials that match your profile.

If you are a registered user, remember to update your treatment or diagnosis information when anything has changed to continue to get the most accurate trial match results.
