

When you are registered and logged in, click the My Profile link.

Your profile contains your diagnosis, demographics, and treatment information that is used to create your personalized list of trials. You can enter as much or as little information as you want in your health profile; however, completing your MTS health profile will give you the most accurate trial matches.

Entering information about your prior treatment is important because it often plays a role in clinical trial eligibility. Treatment history can be complicated, but MTS simplifies this by only collecting what is important for trial matching. It might be helpful to have your medical records available to help you complete your profile.

Don't forget to update your profile whenever there is a change in your treatment or diagnosis to ensure the most accurate trial results. Remember, we never sell or share your personal information for any reason.

★ **Remember:** Help is always available.
